ALEENA AZAM

Software Engineer

Hyderabad, Sindh, Pakistan | 03325967437 | aleenaazamchandio12@gmail.com | linkedin.com/in/aleena-azam-321780322

PROFESSIONAL SUMMARY

Software Engineer and BSCS Gold Medalist with hands-on experience in Python, backend development, RESTful APIs and database integration across the full software development lifecycle. Delivered implementation, integration and support for enterprise academic platforms (SIM, Moodle LMS, TAO Assessment Platform) under a university digital transformation project, and integrated machine learning models into backend applications. Published research author (IJIST).

TECHNICAL SKILLS

Backend and Web: Python, Backend Development, RESTful APIs, Server-Side Development, Database Integration and Operations, Web Application Development, Scalable Software Architecture

Software Engineering Practices: SDLC, Requirement Analysis, Debugging and Troubleshooting, Functional Testing, Code Optimization, Application Deployment, Technical Documentation

System Integration and Enterprise Platforms: System Integration, Application Configuration and Support, Student Information Management System (SIM), Moodle LMS, TAO Assessment Platform

AI and Machine Learning: Machine Learning, Deep Learning, AI Model Integration, Data Preprocessing, YOLOv12s, Late Fusion

Tools and Frameworks: Git, GitHub, Flask, pandas, HTML5, Python Automation, Configuration Management

PROFESSIONAL EXPERIENCE

Application Trainer and Technical Support Officer **January 2026 – November 2026**

Liaquat University of Medical and Health Sciences, Jamshoro, Sindh, Pakistan

- Implemented, configured and tested SIM, Moodle LMS and the TAO Assessment Platform for the university's Digital Transformation and System Integration Project.
- Worked with development teams to identify defects, document requirements, troubleshoot issues and coordinate enhancements.
- Supported system integration, functional testing and deployment; trained faculty and students to drive adoption.

Software Systems Engineer **January 2026 – November 2026**

JAM Web Services, Australia (Remote)

- Coordinated delivery across three university applications: SIM, Moodle LMS and the TAO Assessment Platform.
- Liaised between development teams, stakeholders and university representatives to keep execution aligned.
- Tracked tasks, documented issues and followed up on deliverables to meet project timelines.

AI Developer Intern **July 2025 – October 2025**

Evolvian Softwares (Pvt.) Ltd., Islamabad, Pakistan

- Contributed to AI-driven applications, integrating machine learning models with backend services.
- Helped develop and optimize backend components, RESTful APIs and database operations for scalable web applications.
- Supported data preprocessing, debugging and performance tuning across the SDLC.

Backend Software Engineer Intern **June 2025 – August 2025**

Mehran Sugar Mills Limited, Pakistan

- Contributed to the design, development and maintenance of backend components for enterprise web applications.
- Supported RESTful API development, database integration and server-side functionality.
- Debugged code and resolved technical issues with the development team across the SDLC.

RESEARCH AND PUBLICATIONS

Skin Diseases Detection and Diagnosis Support System Using YOLOv12s and Late Fusion Technique

- Developed a skin disease detection and diagnosis support system using YOLOv12s combined with a late fusion technique.

S. Muneer, A. Azam, Y. A. Malkani and N. e Hira, International Journal of Innovations in Science & Technology (IJIST), vol. 7, no. 10, pp. 55–67, Nov. 2025. Journal issue

EDUCATION

Bachelor of Science in Computer Science (Gold Medalist) **January 2022 – December 2025**

University of Sindh, Jamshoro, Pakistan
